

Environmental Policy

AQUA Leisure Safety & Training Services is committed to the delivery of its services in an environmentally responsible manner, reducing its impact of its operations on the environment, where possible. This commitment covers all aspects of the organisation's operations. We will identify the main environmental impacts of our activities and will endeavour to continually improve our environmental performance. Whilst not seeking ISO14001 certification for an environmental management system we will adhere to its principles and aims as described below.

To achieve this aim and to demonstrate continual improvement, AQUA Leisure Safety will routinely identify, monitor and address its' environmental impacts by setting and meeting the following objectives:

- Fully identifying and complying with relevant legal and other requirements, implementing industry best practice where possible.
- Developing, revising and improving, where practical, processes and procedures to ensure environmental risks are reduced and best practice is adopted.
- Fostering the commitment of all staff towards improving the environmental performance of the business.
- Encouraging the adoption of similar environmental standards from all stakeholders involved in our business.
- Reducing, reusing and recycling materials and resources where possible
- Seeking to prevent pollution through effective control of emissions to air, water and land, waste management, raw materials and natural resources.

AQUA Leisure Safety will ensure this policy and any associated objectives and targets are regularly reviewed and effectively implemented.

This policy statement is communicated to all employees and supply chain partners and publicly displayed on our website.
